## CARBON SOILS

Adding CHARCOAL to soil ~ <http://www.eprida.com> ~ greatly increases crop production for very many years.

Gleaners: <http://www.gleanerscoalition.org> Please set up a  
Gleaners

Group in your community. Thank you.

For more information, please contact local gardeners and farmers  
who

specialize in Organic gardening, Permaculture gardening,  
Biodynamic

gardening, Japanese Kyusei Nature gardening, Biointensive  
gardening,

Heirloom gardening, Agroforestry gardening, Organic Hydroponics  
gardening and Gardening Therapy. Gardening is micro-climate  
specific.

These means that local gardeners might know of gardening  
techniques and

resources which are helpful for the location you live in. Keep  
researching, reading, refining your gardening methods and  
experimenting

with different growing techniques. Eco Gardening technology is  
changing

and improving all the time. Also, as the climate changes, you may  
need

to learn other gardening techniques for various climates.

## GLEANERS

Please set up a Gleaners Group in your community to pick excess vegetables and fruits from your neighbors' gardens, from local farms and

from Farmers Markets for use by your local food bank.

Thank you.

<http://www.gleanerscoalition.org>

A happy green friend AND our favourite green leafy vegetable - the links are here:
